Restaurant Management Software

RESTAURANT MANAGEMENT SOFTWARE

WHY RESTAURANT MANAGEMENT SOFTWARE

Restaurant Management Software is the technology components that enable a Multi-Outlet to better serve its customers with food and beverage transactions and controls.

For a stand-alone restaurant or a chain, **Restaurant Management Software** that provides billings food costing, store control, financial accounting, payroll.

Unlike other restaurant software, it's simple to setup, use and manage, allowing to manage customers in less time and open new restaurants.

With user friendly interface, it improves dining services and increases guest satisfaction.

Restaurant Management Software can support many kinds of restaurants such as mini-restaurant, big restaurant, fast food restaurant, Chain restaurant etc.

Different types of billings can be made like Take away Billing, packing and home delivery Billing, table Billing, coffee shop as well as for Multi-Store outlet etc. We have Touch Base and Normal Screen both type of Billing Option.

Daily or monthly reports can be seen or prepared. KOT Reports can be prepared and inventory can be managed.

Overall, Restaurant Management Software is dependable and Manageable.
